Bottle location report -> targeted navigation

1 Before delivery

agent_0: no agent_2-attributed report for chest_of_drawers_33 in the pre-update state.

2 New attributed report

Turn 1: agent_2 -> agent_0.

bottle_2 is on chest_of_drawers_33 in bedroom_2. I'm barred from there; please get it and put it on counter_25.

3 Next actual action

Turn 2: Navigate[chest_of_drawers_33].

Navigation feedback: succeeded.

Final shared goals: 3/3 (not the immediate navigation result).

One illustrative trace; not a causal ablation. The message may also appear in the native observation channel.
