From a delivered report to the next action

Habitat inspection · episode 588 · agent_1 · seed 891011 · Dynamic SSC

1 Before update

Turn 2 · state v7

Goal: move the vase
to the bedroom table

Vase location:
not recorded

Current plan: search for the vase.

2 Message + state update

Turn 2 · v7 → v8

agent_0 → agent_1

“The vase is on cabinet_20
in kitchen_1 …”

+ Reported vase location

cabinet_20 · from agent_0 · t=2

New claim; not a verified observation.

3 Next planner read

Turn 3 · state v11

Navigate[cabinet_20]

Tool feedback: navigation succeeded

Actual saved frame · turn 3

Highlighted: one newly attributed report. Intermediate state revisions v8→v11 retain this claim.

Observed execution trace, not a causal ablation. The message is also present in the native observation channel.
